Product Description

Product Description

China factory 85% open rate 100% grey polyester fabric roller blinds for living room

Why choose Roller blinds?

The best quality roller blinds can combine shading, sound insulation, security and convenience. It is generally divided into manual and automatic, and can be used with a manual lock if needed, as long as you have a lock on the inside, the curtain will be difficult to open from the outside: unlike cloth curtains, if the connection between the roller blinds and the window is handled well, it can play a very good sound insulation effect. Although you can not do 100% sound insulation, but also can solve a lot of problems; from the point of view of shading, roller blinds are not as good as the heavy cloth curtains. But if it is the use of PVC material roller blinds, the effect of UV protection is also very good. In general, roller blinds are more suitable for use in the bedroom, especially the children's room. Because, the pattern of the roller blinds is more active and not easy to be pulled badly by children.

Specification
